

Where we stand

- Increasing demand
- Awareness of the situation
- Main issues identified
- Global trend of improvement
- Yet access still uneven at national level, different histories, legal framework, institutional arrangements, practices and barriers for crossing frontiers

How to move

- Move together : Eurostat, NSIs, CESSDA, researchers, other stakeholders
- Sharing the burden, sharing knowledge, sharing standards
- Providing a single point of access for researchers
- Building on current possibilities, work on improvement for new possibilities
- Building for current and future needs
 - administrative data, tax data, other data
 - researchers working together on comparative issues across Europe and also out of Europe

Several initiatives

- Build on the different initiatives
- DwB as a brick for future development
- Still open for more cooperation
